

A better day starts with a better plan.

Scheduling, driver workflow and owner visibility - connected in one operations app.

CONCRETE DISPATCH

Help the office book confidently.
Help drivers arrive prepared.
Help owners see where to improve.

Truck 1 · Earliest

7:00 AM

From yard

8.3 road mi · 30 min
scheduled

16.8 mi added to the
day

Details

Truck 2

7:00 AM

From yard

8.3 road mi · 30 min
scheduled

16.8 mi added to the day

Details

Your trucks. Your customers. One connected workflow.

A visual tour of the tool, from choosing a delivery time to reviewing the business.

Offer times you can explain.

Suggested arrivals compare trucks and road routes, including returns and the next job.

Truck 1 · Earliest 7:00 AM From yard 8.3 road mi · 30 min scheduled 16.8 mi added to the day Details	Truck 2 7:00 AM From yard 8.3 road mi · 30 min scheduled 16.8 mi added to the day Details
--	---

WHAT YOU SEE

- Earliest arrival by truck
- Road miles and scheduled drive time
- Miles added to the day
- Later slots that leave room for another job

Or leave room for another job

Truck 1 · later slot 10:00 AM After a typical 4-yard job	Truck 2 · later slot 10:00 AM After a typical 4-yard job
---	---

WHY IT MATTERS

Offer a practical time while the customer is still on the phone. See the trade-off before you commit.

Turn availability into a sales conversation.

“We can offer the earliest opening, or a later slot that keeps the morning available.”

Actual app example. Suggested times depend on the selected job and schedule.

Know where the truck is going.

Review the road route and agree on the site entrance before confirming the job.

PIN THE ENTRANCE

Use the satellite image to clarify access.

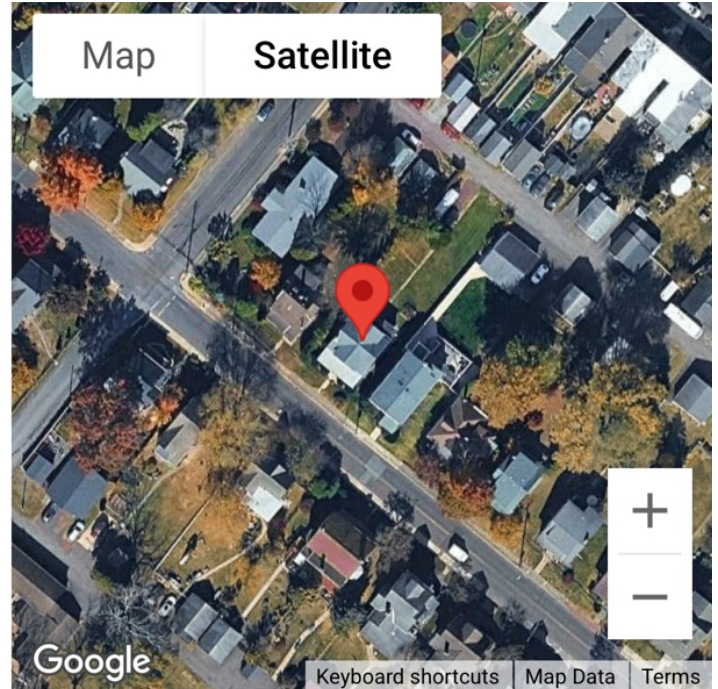

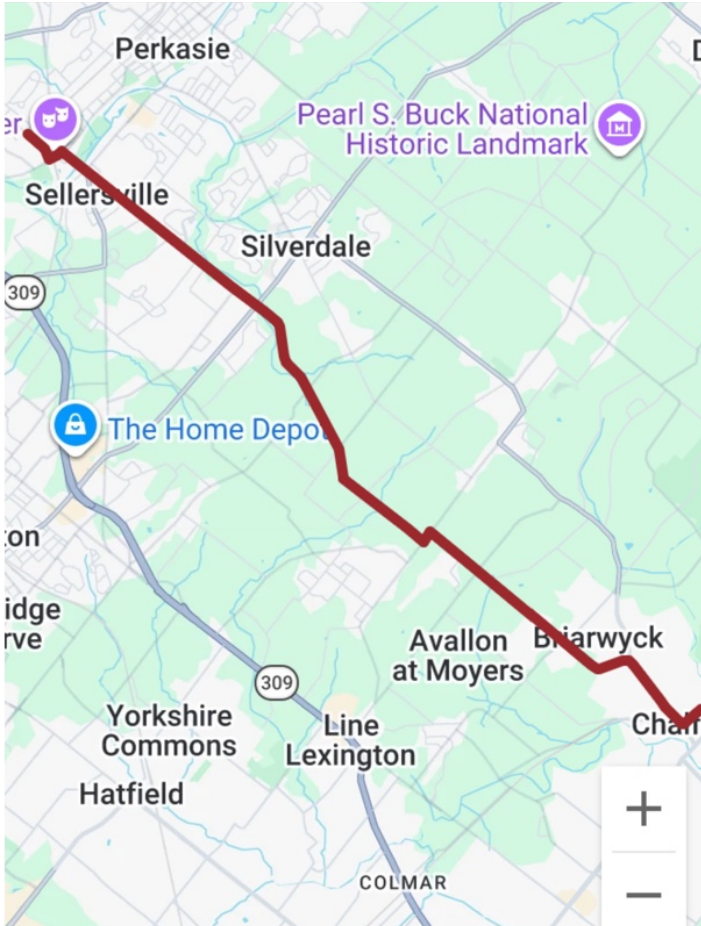

Back

Confirm details →

Fewer vague directions. A clearer destination for dispatch and the driver.

The next step should be obvious.

From the day's overview to arrival and completion, the job stays connected.

ROUTE + SITE CONTEXT

Drivers can open the job's route and site reference. These current booking screens show the location information used in the handoff.

TODAY'S OUTLOOK

- Assigned jobs in order, with times and quantities
- Job details, materials and access notes

ON MY WAY → ARRIVED

- Record departure and open navigation
- Prepare an arrival-range text
- Record arrival, then actual yards and ticket details

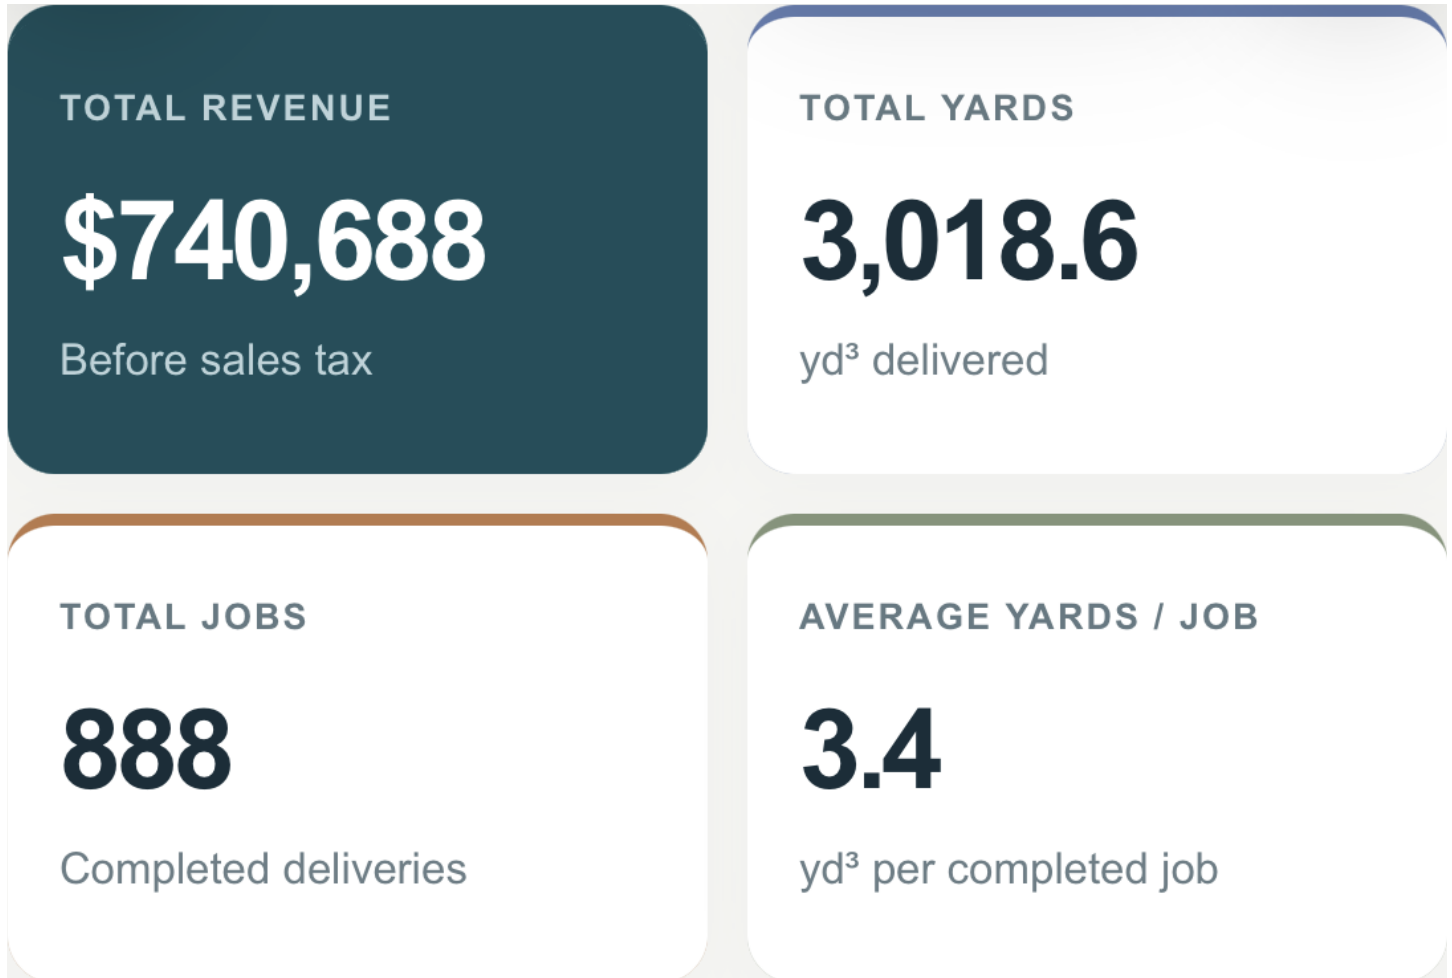

Less chasing. A more prepared customer.

Give dispatch a recorded status and the customer a clearer idea of when to be ready.

Texts currently open the phone's messaging app for sending. Automatic SMS requires connection.

See what your fleet produced.

Revenue, production and delivery activity in one owner view.

FEATURES AT A GLANCE

- Revenue before sales tax
- Delivered yards and completed jobs
- Average yards per job
- Truck performance and monthly trends

THE OWNER BENEFIT

Know what the operation produced. Ask whether a change came from more jobs, different job sizes or a shift between trucks - without piecing together separate records.

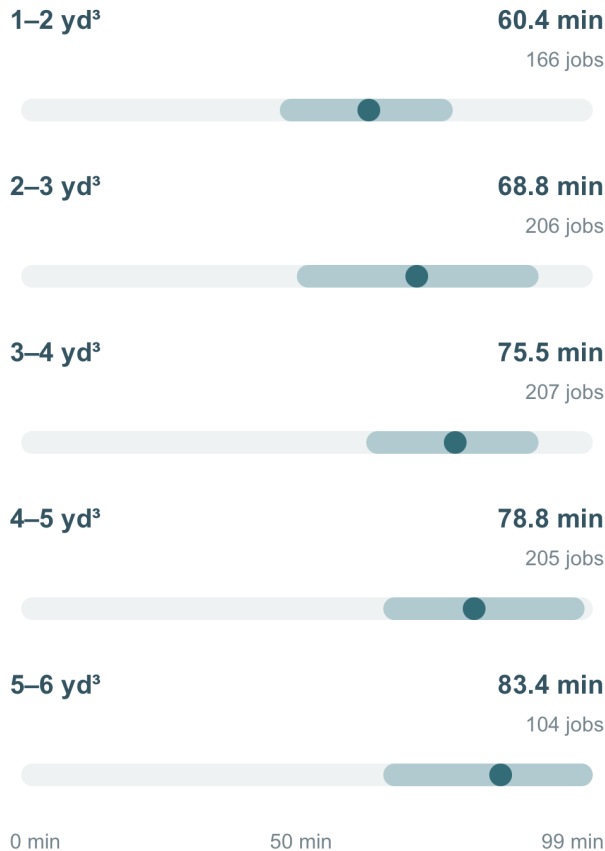

Actual dashboard screenshot. All displayed business figures in this booklet are simulated test data.

05 / IMPROVE THE PLAN

Use completed jobs to improve the plan.

Use recorded performance to ask better questions about time, quantities and reliability.

How long does each job size take?

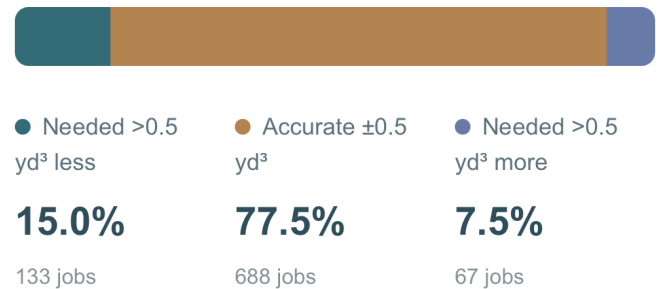

Dot = average · band = central 80% observed · arrival through recorded completion.

PLAN WITH OBSERVED TIMES

Compare on-site duration by job size. Use the average and observed range to review planning allowances.

How accurate are customers' orders?

222.1 yd³

Ordered but not needed

146.7 yd³

Supplied beyond the order

Within half a yard of the order counts as accurate, including exactly ± 0.5 yd³. Volume totals include all differences, even within that tolerance.

UNDERSTAND ORDER VARIANCE

See which orders needed more or less. Quantities within half a yard count as accurate.

ALSO TRACK

- On-time arrivals and planned finishes
- Actual truck travel versus Google estimates
- Operator performance and washout patterns

Find the cause before adding capacity.

Long jobs, travel and scheduling allowances affect what the fleet can deliver in a day.

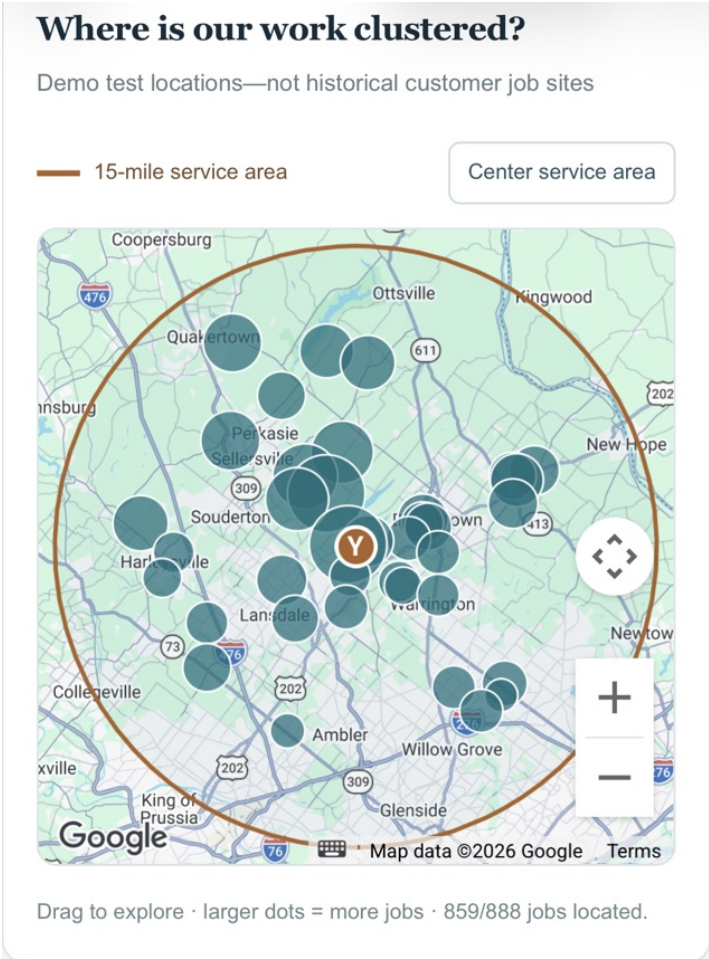

See who brings the work - and where.

Use customer and geographic demand patterns to guide follow-up and booking conversations.

CUSTOMER RELATIONSHIPS

See who brings revenue, understand customer concentration and focus repeat-business conversations.

GEOGRAPHIC DEMAND

- See clusters of completed jobs
- Compare demand by town
- Bring location into booking decisions

Growth becomes easier to discuss with a shared picture.

Combine customer knowledge with where the work is happening and what the trucks can support.

YOUR NEXT STEP

See your operation in the app.

Walk through a real job with your company's trucks, pricing and delivery rules.

Truck 1 · Earliest 7:00 AM From yard 8.3 road mi · 30 min scheduled 16.8 mi added to the day Details	Truck 2 7:00 AM From yard 8.3 road mi · 30 min scheduled 16.8 mi added to the day Details	TOTAL REVENUE \$740,688 Before sales tax TOTAL JOBS 888 Completed deliveries	TOTAL YARDS 3,018.6 yd³ delivered AVERAGE YARDS / JOB 3.4 yd³ per completed job

ONE CONNECTED WORKFLOW

- Quote and booking
- Suggested times
- Route and site context
- Driver status and tickets
- Owner reporting

WHAT A SMALL IMPROVEMENT COULD MEAN

45-75 hours

Illustrative annual booking time saved:
900 bookings x 3-5 minutes.

\$36,000

Illustrative extra annual revenue:
1 additional \$900 job/week x 40 weeks.

Examples, not measured results or guarantees. Extra jobs require demand and available capacity. Revenue is not profit; saved time is not necessarily reduced payroll.
